

Avaya Interactive Response Voted Best Enterprise Platform 2005 and 2004!

Avaya Interactive Response and Avaya Dialog Designer were voted Best Enterprise Voice Platform 2005 during the annual Speech Solution Awards. Winners were announced prior to the closing keynote on Wednesday, August 3 at the 11th annual SpeechTEK Educational Conference and Exposition at the New York Marriott Marquis.

Each year, the *Speech Technology Magazine* Speech Solutions Awards are presented to companies whose efforts have propelled the speech industry forward. This is the second year in a row that Avaya Interactive Response solutions were recognized by the industry.

“The speech industry is filled with hundreds of companies who consistently bring to market superior products and exceptional solutions for their customers and partners,” said John Kelly, publisher and editor-in-chief of *Speech Technology Magazine*, principle sponsor of SpeechTEK events. “Each year, our readers nominate those companies whose products and services stand head and shoulders above the rest.”*
