

W0. Introduction

W0.1

(W0.1) Give a general description of and introduction to your organization.

Avaya is a global leader in digital communications products, solutions and services for businesses of all sizes. We enable organizations around the globe to succeed by creating intelligent communications experiences for customers and employees. Avaya builds open, converged and innovative solutions to enhance and simplify communications and collaboration in the cloud, on-premises or a hybrid of both. Our global, experienced team of professionals delivers award-winning services from initial planning and design, to seamless implementation and integration, to ongoing managed operations, optimization, training and support. As of September 30, 2018, we had a presence in approximately 180 countries worldwide and during the past three fiscal years we served more than 90% of the Fortune 100 organizations.

Our business has two operating segments: Products & Solutions and Services. Effective September 30, 2018, the Company changed the name of its Global Communications Solutions ("GCS") and Avaya Global Services ("AGS") segments to "Products & Solutions" and "Services," respectively. These were name changes only and did not have an impact on the operating results of each segment. Avaya also previously had a Networking business, which was sold on July 14, 2017.

For more information, please visit www.avaya.com.

W0.2

(W0.2) State the start and end date of the year for which you are reporting data.

	Start date	End date
Reporting year	January 1 2018	December 31 2018

W0.3

(W0.3) Select the countries/regions for which you will be supplying data.

W0.4

(W0.4) Select the currency used for all financial information disclosed throughout your response.

USD

W0.5

(W0.5) Select the option that best describes the reporting boundary for companies, entities, or groups for which water impacts on your business are being reported.

Companies, entities or groups over which operational control is exercised

W0.6

(W0.6) Within this boundary, are there any geographies, facilities, water aspects, or other exclusions from your disclosure?

Yes

W0.6a

(W0.6a) Please report the exclusions.

Exclusion	Please explain
Sites smaller than 400 square feet	Sites smaller than 400 square feet are excluded from this questionnaire. These sites comprise 0.2% of our real estate footprint and can include storage space, so their water use is deemed to be negligible.
Belleville	No data on overall water risk was available for Belleville in the WRI Aqueduct tool, so it is excluded from our evaluation of sites exposed to water-related risk. However, Belleville is included in our water accounting data (withdrawals, discharges, consumption).

W1. Current state

W1.1

(W1.1) Rate the importance (current and future) of water quality and water quantity to the success of your business.

	Direct use importance rating	Indirect use importance rating	Please explain
Sufficient amounts of good quality freshwater available for use	Important	Important	The primary use of freshwater in our direct operations is in our office buildings for sanitation, heating and cooling, and in our data centers. The primary indirect use of freshwater is for product manufacturing, which is outsourced to suppliers around the world. The rating of "important" was selected for both direct and indirect use because water is needed to provide adequate heating and cooling in our facilities, and for cooling, process uses, and cleaning in manufacturing. We do not expect our future water dependency to change significantly for direct or indirect use, but we do aim to implement water efficiencies and decrease our consumption where possible.
Sufficient amounts of recycled, brackish and/or produced water available for use	Neutral	Neutral	Avaya considers the use of recycled water important for water conservation and sustainability. A majority of Avaya's real estate portfolio is leased space. Due to the nature and scope of our water use, there are limited opportunities within our operational control to utilize recycled water in our direct and indirect use, but we do look for these opportunities when evaluating leases for new facilities. Therefore, the importance rating of "neutral" has been selected.

W1.2

(W1.2) Across all your operations, what proportion of the following water aspects are regularly measured and monitored?

	% of sites/facilities/operations	Please explain
Water withdrawals – total volumes	76-99	Avaya measures and monitors water withdrawals across its major locations (i.e. sites greater than 400 square feet within our operational boundary), which accounts for 99.8% of our total square footage. Avaya has access to actual water data from utility bills for 12 out of 106 sites that it measures and monitors monthly, which accounts for 11% of our facilities. Avaya estimates withdrawals for the remaining sites based on the data from these facilities by calculating the average water consumption (gal) per square foot.
Water withdrawals – volumes from water stressed areas	76-99	Avaya measures and monitors water withdrawals across its major locations (i.e. sites greater than 400 square feet within our operational boundary), which accounts for 99.8% of our total square footage. Avaya has access to actual water data from utility bills for 12 out of 106 sites that it measures and monitors monthly, which accounts for 11% of our facilities. Avaya estimates withdrawals for the remaining sites based on available data from these facilities. Water stressed areas are identified using the WRI Aqueduct tool.
Water withdrawals – volumes by source	76-99	Avaya measures and monitors water withdrawals across its major locations (i.e. sites greater than 400 square feet within our operational boundary), which accounts for 99.8% of our total square footage. Avaya has access to actual water data from utility bills for 12 out of 106 sites that it measures and monitors monthly, which accounts for 11% of our facilities. Avaya estimates withdrawals for the remaining sites based on available data from these facilities.
Entrained water associated with your metals & mining sector activities - total volumes [only metals and mining sectors]	<Not Applicable>	<Not Applicable>
Produced water associated with your oil & gas sector activities - total volumes [only oil and gas sector]	<Not Applicable>	<Not Applicable>
Water withdrawals quality	76-99	Avaya measures and monitors water withdrawals across its major locations (i.e. sites greater than 400 feet within our operational boundary), which accounts for 99.8% of our total square footage. Avaya has access to actual water data from utility bills for 12 out of 106 sites that it measures and monitors monthly, which accounts for 11% of our facilities. Avaya estimates withdrawals for the remaining sites based on available data from these facilities. Avaya's water withdrawals are from third party sources (i.e. utilities), who are responsible for monitoring the quality of the water.
Water discharges – total volumes	76-99	Avaya measures and monitors water withdrawals across its major locations (i.e. sites greater than 400 feet within our operational boundary), which accounts for 99.8% of our total square footage. Avaya has access to actual water data from utility bills for 12 out of 106 sites that it measures and monitors regularly, which accounts for 11% of our facilities. Avaya estimates withdrawals for the remaining sites based on available data from these facilities. Avaya does not incorporate water into any of its products and the water withdrawn for use in our office buildings is discharged back into the water environment. Therefore, our consumption is 0 and our withdrawals equals our discharges.
Water discharges – volumes by destination	76-99	Avaya measures and monitors water withdrawals across its major locations (i.e. sites greater than 400 feet within our operational boundary), which accounts for 99.8% of our total square footage. Avaya has access to actual water data from utility bills for 12 out of 106 sites that it measures and monitors regularly, which accounts for 11% of our facilities. Avaya estimates withdrawals for the remaining sites based on available data from these facilities. CDP defines consumption as the amount of water that is drawn into the company boundary and not discharged back to the water environment or a third party. Avaya does not incorporate water into any of its products and the water withdrawn for use in our office buildings is discharged back into the water environment. Withdrawals = Consumption + Discharge; therefore, our consumption is 0 and our withdrawals equals our discharges.
Water discharges – volumes by treatment method	Not relevant	This is not relevant because Avaya's water discharges go to third-party destinations, such as municipal wastewater plants and public/private utilities. We do not expect this to be relevant in the future.
Water discharge quality – by standard effluent parameters	Not relevant	This is not relevant because Avaya's water discharges go to third-party destinations, such as municipal wastewater plants and public/private utilities. We do not expect this to be relevant in the future.
Water discharge quality – temperature	Not relevant	This is not relevant because Avaya's water discharges go to third-party destinations, such as municipal wastewater plants and public/private utilities. We do not expect this to be relevant in the future.
Water consumption – total volume	100%	CDP defines consumption as the amount of water that is drawn into the company boundary and not discharged back to the water environment or a third party. Avaya does not incorporate water into any of its products and the water withdrawn for use in our office buildings is discharged back into the water environment. Withdrawals = Consumption + Discharge; therefore, our consumption is 0 and our withdrawals equals our discharges
Water recycled/reused	Not monitored	We do not currently monitor recycled/reused water but are looking into future capabilities.

	% of sites/facilities/operations	Please explain
The provision of fully-functioning, safely managed WASH services to all workers	100%	Fully-functioning, safely managed WASH services (i.e. water, sanitation, and hygiene facilities) is a company-wide requirement for Avaya facilities.

W1.2b

(W1.2b) What are the total volumes of water withdrawn, discharged, and consumed across all your operations, and how do these volumes compare to the previous reporting year?

	Volume (megaliters/year)	Comparison with previous reporting year	Please explain
Total withdrawals	203	This is our first year of measurement	Our total withdrawals – actual and estimated – was 203 megaliters (53,576,703 gallons) in 2018. Since this is our first year of measurement, we cannot compare our total withdraws with the previous year. Looking forward, we expect our water withdrawals to decrease as a result of future real estate consolidations or remain the same.
Total discharges	203	This is our first year of measurement	CDP defines consumption as the amount of water that is drawn into the company boundary and not discharged back to the water environment or a third party. Avaya does not incorporate water into any of its products and the water withdrawn for use in our office buildings is discharged back into the water environment. Therefore, our consumption is 0 and our withdrawals equals our discharges.
Total consumption	0	This is our first year of measurement	CDP defines consumption as the amount of water that is drawn into the company boundary and not discharged back to the water environment or a third party. Avaya does not incorporate water into any of its products and the water withdrawn for use in our office buildings is discharged back into the water environment. Therefore, our consumption is 0 and our withdrawals equals our discharges.

W1.2d

(W1.2d) Provide the proportion of your total withdrawals sourced from water stressed areas.

	% withdrawn from stressed areas	Comparison with previous reporting year	Identification tool	Please explain
Row 1	13	This is our first year of measurement	WRI Aqueduct	Avaya uses the WRI Aqueduct Tool to determine which of its facilities are in water stressed areas. Water stressed areas are those deemed “high risk” and “extremely high risk”. In 2018, 26 megaliters (6,980,125 gallons) of water were withdrawn from water stressed areas, which accounts for 13% of our total withdrawals.

W1.2h

(W1.2h) Provide total water withdrawal data by source.

	Relevance	Volume (megaliters/year)	Comparison with previous reporting year	Please explain
Fresh surface water, including rainwater, water from wetlands, rivers, and lakes	Not relevant	<Not Applicable>	<Not Applicable>	Avaya does not source its water withdrawals from fresh surface water.
Brackish surface water/Seawater	Not relevant	<Not Applicable>	<Not Applicable>	Avaya does not source its water withdrawals from brackish surface water/seawater.
Groundwater – renewable	Not relevant	<Not Applicable>	<Not Applicable>	Avaya does not source its water withdrawals from groundwater.
Groundwater – non-renewable	Not relevant	<Not Applicable>	<Not Applicable>	Avaya does not source its water withdrawals from groundwater.
Produced/Entrained water	Not relevant	<Not Applicable>	<Not Applicable>	Avaya does not source its water withdrawals from produced/entrained water.
Third party sources	Relevant	203	This is our first year of measurement	Avaya sources its water withdrawals from third-party sources such as municipal water suppliers and public/private utilities. This is our first year of measurement, so we are unable to compare our withdrawals to any previous years.

W1.2i

(W1.2i) Provide total water discharge data by destination.

	Relevance	Volume (megaliters/year)	Comparison with previous reporting year	Please explain
Fresh surface water	Not relevant	<Not Applicable>	<Not Applicable>	This is not relevant because Avaya does not discharge water to fresh surface water.
Brackish surface water/seawater	Not relevant	<Not Applicable>	<Not Applicable>	This is not relevant because Avaya does not discharge water to brackish surface water/seawater.
Groundwater	Not relevant	<Not Applicable>	<Not Applicable>	This is not relevant because Avaya does not discharge water to groundwater.
Third-party destinations	Relevant	203	This is our first year of measurement	This is relevant because Avaya's water discharges go to third-party destinations, such as municipal wastewater plants and public/private utilities.

W1.4

(W1.4) Do you engage with your value chain on water-related issues?

- Yes, our suppliers
- Yes, our customers or other value chain partners

W1.4a

(W1.4a) What proportion of suppliers do you request to report on their water use, risks and/or management information and what proportion of your procurement spend does this represent?

Row 1

% of suppliers by number

1-25%

% of total procurement spend

51-75

Rationale for this coverage

As a member of the Responsible Business Alliance (RBA), Avaya adopted the RBA Code of Conduct, which includes provision on water management and pollution prevention. Avaya requires its Tier 1 suppliers to adopt the Code of Conduct by including it in our contracts. Avaya incentivizes suppliers to report water management information by sending requests through the RBA online tool and nominating suppliers to undergo annual audits. Approximately 11% of our direct Tier 1 suppliers are monitored through the RBA online tool, which represents 55% of our total procurement spend.

Impact of the engagement and measures of success

Information that is requested from our suppliers includes water management, wastewater management, sanitation and hygiene, and pollution prevention practices through RBA online audits. This information is used within the company to audit our suppliers to ensure compliance with the Code and minimize supply chain risk. Measures of success include: an increased number of suppliers in the electronics industry adopting the RBA Code of Conduct; an increased number of suppliers passing audits; and reduced number of findings resulting from supplier audits.

Details of engagement

Requirement to adhere to our code of conduct regarding water stewardship and management

% of suppliers by number

76-100

% of total procurement spend

76-100

Rationale for the coverage of your engagement

As a member of the Responsible Business Alliance (RBA), Avaya adopted the RBA Code of Conduct, which includes requirements related to water stewardship and management. Avaya requires its direct Tier 1 suppliers to adhere to the RBA Code of Conduct by including it in our contracts. Approximately 95% of our suppliers are direct Tier 1 suppliers, which represents 89% of our total procurement spend.

Impact of the engagement and measures of success

By requiring our direct Tier 1 suppliers to adhere to the RBA Code of Conduct, Avaya is promoting environmental responsibility in the electronics supply chain and reducing our supply chain water risk. Avaya reserves the right to audit our suppliers to ensure compliance with the Code. Measures of success include: an increased number of suppliers in the electronics industry adopting the RBA Code of Conduct; an increased number of suppliers passing audits; and reduced number of findings resulting from supplier audits.

Comment

W1.4c

(W1.4c) What is your organization's rationale and strategy for prioritizing engagements with customers or other partners in its value chain?

Avaya engages with its customers on climate- and water-related issues. Avaya publishes an annual Corporate Responsibility Report to share information on our environmental commitments, goals, and initiatives, including our efforts to address the issue of water pollution by reducing single-use plastic packaging (pg. 12) and employee volunteering (pg. 13). In addition, Avaya engages with its customers directly by responding to customer requests throughout the year on our environmental performance and corporate responsibility initiatives.

Avaya improves its relationship with its customers by being transparent and sharing information on our environmental initiatives both publicly and through specific customer questionnaires. Customer satisfaction with our questionnaire responses, which can be measured by our rating on customer surveys, is an important measure of our success.

W2. Business impacts

W2.1

(W2.1) Has your organization experienced any detrimental water-related impacts?

No

W2.2

(W2.2) In the reporting year, was your organization subject to any fines, enforcement orders, and/or other penalties for water-related regulatory violations?

No

W3. Procedures

W3.3

(W3.3) Does your organization undertake a water-related risk assessment?

Yes, water-related risks are assessed

W3.3b

(W3.3b) Which of the following contextual issues are considered in your organization’s water-related risk assessments?

	Relevance & inclusion	Please explain
Water availability at a basin/catchment level	Relevant, always included	Avaya considers water availability when managing its real estate footprint. When evaluating locations for new facilities, Avaya Real Estate ensures there is adequate clean water available for essential needs such as sanitation, hygiene, heating, and cooling. In addition, Avaya monitors current and future water availability and quality for its existing locations using the WRI Aqueduct tool.
Water quality at a basin/catchment level	Relevant, always included	Avaya considers water quality and supply when managing its real estate footprint. When evaluating locations for new facilities, Avaya Real Estate ensures there is adequate clean water available for essential needs such as sanitation, hygiene, heating, and cooling. In addition, Avaya monitors current and future water availability and quality for its existing locations using the WRI Aqueduct tool.
Stakeholder conflicts concerning water resources at a basin/catchment level	Not relevant, explanation provided	Avaya purchases its water from local utilities, so stakeholder conflicts concerning water resources was not deemed relevant. Looking ahead, we do not anticipate this issue becoming relevant.
Implications of water on your key commodities/raw materials	Relevant, always included	Avaya considers implications of water on our key commodities and raw materials as part our risk assessment using the Responsible Business Alliance (RBA) online tool. Through the tool, Avaya requests information from our suppliers on their water stewardship and management along with other environmental practices such as energy, carbon emissions, and waste. Avaya then evaluates the information to understand, track, and mitigate our supply chain risk, including risks relating to water.
Water-related regulatory frameworks	Relevant, always included	Legal and regulatory risks are evaluated annually as part of Avaya’s company-wide risk assessment and as part of the WRI Aqueduct tool. Avaya could face legal risks if we fail to comply with environmental laws and regulations, so we monitor compliance for our facilities on an ongoing basis. We have not experienced a significant impact on our business due to water-related regulations, and due to the nature and scope of our water use, we do not anticipate any material impacts on our business in the future.
Status of ecosystems and habitats	Relevant, always included	Avaya uses the WRI Aqueduct tool to evaluate water risks annually. The tool provides data on the percentage of threatened amphibians, which serve as a proxy for ecosystem health and vulnerability. Based on this data, Avaya is able to consider the status of ecosystems and habitats in our major locations around the world as part of our risk assessment.
Access to fully-functioning, safely managed WASH services for all employees	Relevant, always included	Fully-functioning, safely managed WASH services (i.e. water, sanitation, and hygiene facilities) is a company-wide requirement for Avaya facilities. Avaya monitors water availability/quality through the WRI Aqueduct tool, which is needed for WASH services, on an annual basis. In addition, Avaya has internal processes, such as inspections, to ensure maintenance of WASH services across our facilities.
Other contextual issues, please specify	Not considered	

W3.3c

(W3.3c) Which of the following stakeholders are considered in your organization’s water-related risk assessments?

	Relevance & inclusion	Please explain
Customers	Relevant, always included	Avaya continually works towards understanding and fulfilling our customer wants and needs. Therefore, customers are included in our water-related risk assessments. Avaya engages with its customers on environmental issues and keeps them informed on our policies, practices, and programs to reduce our environmental footprint. For example, Avaya receives and responds to customer questionnaires on an ongoing basis, which include questions on our water stewardship and management. In addition, Avaya publishes an annual Corporate Responsibility report, communicates with customers through our social media, and makes our environmental and corporate responsibility policies available on our website. Risks that are evaluated include reputational harm from failure to take action on water issues, and service interruptions or damage from extreme weather or climate change (flooding, drought, sea level rise) that would impact our ability to serve our customers. We expect customers to be more relevant in the future as customer demand for corporate responsibility and climate action increases.
Employees	Relevant, always included	Avaya is committed to providing a safe, healthy, and desirable place to work for our employees. Therefore, employees are included in our water-related risk assessments. Access to adequate, clean water at our facilities is a necessity for our employees; water is required for restrooms, drinking fountains, and cleaning to maintain proper sanitation and hygiene. If we did not have access to clean water for our employees, we would not be able to operate our facilities which would result in financial losses and service interruptions to our customers. Avaya engages with its employees on sustainability issues, including water, through our annual Corporate Responsibility Report and internal communications. We expect customers to continue to be a relevant stakeholder in the future since we are firm in our commitment to providing a safe and healthy work environment.
Investors	Relevant, always included	There is increasing investor interest on the environmental, social, and governance performance of companies, which includes water-related issues. Investors are a key stakeholder for Avaya and therefore included in our water-related risk assessments. Failure to take action on water-related issues could result in reputational harm and impact our position with investors. Avaya discloses its environmental practices by posting its annual Corporate Responsibility Report and environmental policies on its website. We expect that investor interest of our environmental performance will continue to increase in the future as the need for climate change mitigation intensifies.
Local communities	Relevant, always included	Avaya believes it is our responsibility to make the world a better place and part of that is positively impacting local communities in which we operate. Avaya engages with local communities through employee-led volunteer efforts throughout the year, which tackle issues such as ocean pollution. We also use the WRI Aqueduct tool to factor local communities into our water risk assessments and analyze which communities are experiencing the highest water risk around the world.
NGOs	Please select	Avaya partners with various NGOs on its corporate responsibility and environmental, health and safety initiatives; therefore, NGOs are included in our water-related risk assessments. For example, Avaya is a member of the Responsible Business Alliance (RBA), the world’s largest industry coalition dedicated to corporate social responsibility in global supply chains. As an RBA member, Avaya adopted the RBA Code of Conduct, which includes requirements around water management and stewardship, and requires our direct Tier 1 suppliers to do the same. We expect NGOs to remain a relevant stakeholder since they help us maintain oversight of water-related issues in our supply chain.
Other water users at a basin/catchment level	Not relevant, explanation provided	Avaya sources its water from municipalities, so Avaya does not engage with other water users at a basin/catchment level.
Regulators	Relevant, always included	Legal and regulatory risks are evaluated annually as a part of Avaya’s company-wide risk assessment. Avaya could face legal risks if we fail to comply with environmental laws, responsibly source materials in our supply chain, or sufficiently disclose our material financial risks. If Avaya failed to comply with laws, it could impact our company financially through increased costs and reduced demand for our products and services resulting from fines and judgments.
River basin management authorities	Not relevant, explanation provided	Avaya does not engage with river basin management authorities, so they are not included in our water-related risk assessment at this time.
Statutory special interest groups at a local level	Not relevant, explanation provided	CDP defines statutory special interest groups as any body or organization which the company is obliged to consult with on water issues due to a statutory or regulatory requirement. Avaya does not engage with statutory special interest groups, so they are not included in our water-related risk assessments.
Suppliers	Relevant, always included	Supply chain risks are evaluated annually as a part of Avaya’s company-wide risk assessment. Avaya engages with its direct Tier 1 suppliers and monitors their compliance to water-related issues through the Responsible Business Alliance (RBA) online tool.
Water utilities at a local level	Relevant, always included	Water utilities are included in Avaya’s water-related risk assessment because Avaya relies on utilities for adequate water supply for its facilities around the world. A service interruption in our water supply would impact Avaya’s ability to operate the affected facility; this could impact our ability to serve our customers, leading to decreased revenues and productivity. We expect utilities to remain a relevant stakeholder because we will continue to source our water from them in the future.
Other stakeholder, please specify	Not considered	

(W3.3d) Describe your organization's process for identifying, assessing, and responding to water-related risks within your direct operations and other stages of your value chain.

Avaya uses an integrated, cross functional and company-wide risk management process to evaluate climate change risks and opportunities – including water-related risks, such as extreme weather events – on an annual basis. Avaya Corporate Responsibility/EHS works directly with the business continuity and real estate team to evaluate, assess, and mitigate risks that impact our facilities around the world. The risk assessment is then reviewed and approved by the Vice President & Deputy General Counsel.

The scope of the risk management process includes, but is not limited to, the following: upcoming regulations in the countries where we operate and sell products, customer behavior changes and expectations, reputational risks for not taking action on environmental issues, and weather-related changes. Risks are assessed in the short (0-3 years), medium (3-10 years), and long-term horizons (10-30 years). Risks and opportunities are assessed at a company level, regional level and at an asset level. Additionally, with facilities across the globe, climate change risks and opportunities are assessed in terms of where our facilities are located and how our global operations could be impacted by severe weather such as flooding.

W4. Risks and opportunities

W4.1

(W4.1) Have you identified any inherent water-related risks with the potential to have a substantive financial or strategic impact on your business?

Yes, both in direct operations and the rest of our value chain

W4.1a

(W4.1a) How does your organization define substantive financial or strategic impact on your business?

Avaya considers a risk to be substantive if it has the potential to have a material legal, financial, operational, and/or reputational impact on our direct operations and/or supply chain. To determine whether an identified risk or opportunity is considered substantive, we compare its impact to Avaya's annual revenue and other related thresholds, which include: severity of legal and compliance ramifications (e.g. fines, penalties, lawsuits); impact on operating costs; the impact on our ability to successfully deliver products and services to our customers; potential for and length of service interruptions; and the amount of time needed to recover from reputational harm. Impacts are rated on a scale of 1 to 5, with 1 being "insignificant" (i.e. no press exposure, no regulatory or legal action, limited or no impact on customers, no impact on earnings) and 5 being "catastrophic" (i.e. significant reputational damage, criminal penalties and fines, potential sanctions, need to restate earnings). Based on this assessment, we map high priority risks, determine ownership of the risks, and work collaboratively to develop mitigation strategies and monitoring.

An example of a substantive impact is service interruptions or delays caused by extreme weather events. Our cloud-based based solutions rely on uninterrupted connection to the Internet through data centers and networks. To provide such service for our customers in North America, we utilize data center hosting facilities located in California, Colorado, Florida, Georgia, Iowa, North Carolina, Ohio, Oregon, Virginia and Washington. We also intend to serve other global customers from data center hosting facilities located in India, Japan and Singapore. We do not control the operation of these facilities, and they are vulnerable to service interruptions or damage from floods, earthquakes, fires, power loss, telecommunications failures and similar events. The occurrence of these or other unanticipated problems at these facilities could result in lengthy interruptions in the ability to use our solutions efficiently or at all, which could harm our business, operating results and financial condition.

W4.1b

(W4.1b) What is the total number of facilities exposed to water risks with the potential to have a substantive financial or strategic impact on your business, and what proportion of your company-wide facilities does this represent?

	Total number of facilities exposed to water risk	% company-wide facilities this represents	Comment
Row 1	4	1-25	Avaya uses the WRI Aqueduct tool to evaluate the number of our facilities exposed to water risks around the world. The tool maps indicators of water-related risks around the world, including degree of physical risks, flood occurrence, and drought severity. Based on this data, the tool combines indicator scores to generate an overall water risk, as follows low (0-1), low to medium (2-3), medium to high (4-9), high (10-27), and extremely high (>27). Avaya does not use a significant amount of water; therefore, only sites marked as "extremely high" risk are considered to have a potential substantive impact on our business. In 2018, 4 facilities were in regions with extremely high water risk, representing 1% of our total facilities.

W4.1c

(W4.1c) By river basin, what is the number and proportion of facilities exposed to water risks that could have a substantive impact on your business, and what is the potential business impact associated with those facilities?

Primary risk driver

Flooding

Primary potential impact

Impact on company assets

Company-specific description

Our operations and those of our contract manufacturers and outsourced service providers are vulnerable to interruption by flooding at our global locations. For example, our headquarters is located in the San Francisco Bay Area of California, which is vulnerable to damage from flooding. If any disaster were to occur, our ability and the ability of our contract manufacturers and outsourced service providers to operate could be seriously impaired and we could experience material harm to our business, operating results and financial condition. In addition, the coverage or limits of our business interruption insurance may not be sufficient to compensate for any losses or damages that may occur.

Yes, a single figure estimate

Potential financial impact figure (currency)

6500000

Potential financial impact figure - minimum (currency)

<Not Applicable>

Potential financial impact figure - maximum (currency)

<Not Applicable>

Explanation of financial impact

If one of Avaya's facilities was located in an area impacted by flooding, there is a potential for physical damage to the building. For example, if Avaya's headquarters in Santa Clara was impacted, the financial impact would be less than \$6.5 million based on the value of the building contents. Avaya's business continuity team assesses the real estate asset values of its portfolio against current market rates to calculate the risk.

Primary response to risk

Amend the Business Continuity Plan

Description of response

Avaya Corporate Security and Business Continuity has developed location-based risk assessments for facilities over 50 people that cover physical risks, which includes flooding. Based on the risk assessments, the Corporate Security and Business Continuity team develops management plans that are comprehensive in scope; for example, if flooding occurs in one location, other facilities can provide ongoing support and/or production. In addition, each Avaya location has an Emergency Preparedness Plan which helps ensure the safety of our employees and minimize damage in the event of a flooding event. The Corporate Security and Business Continuity team evaluates these risks annually and amends/updates the risk assessments and management plans accordingly.

Cost of response

Type of risk

Reputation & Markets

Primary risk driver

Increased stakeholder concern or negative stakeholder feedback

Primary potential impact

Brand damage

Company-specific description

Avaya is experiencing increasing demand from customers, investors, stakeholders, and the public for companies to address climate change – including water-related issues – and implement measures to collectively reduce our environmental impact. For example, we are requested to respond to the CDP Water Questionnaire by some of our customers. Failure to take action, demonstrate leadership, or comply with environmental or water-related developments can impact the Avaya brand and reputation.

Are you able to provide a potential financial impact figure?

Yes, a single figure estimate

Potential financial impact figure (currency)

28510000

Potential financial impact figure - minimum (currency)

<Not Applicable>

Potential financial impact figure - maximum (currency)

<Not Applicable>

Explanation of financial impact

If Avaya's reputation was negatively impacted due to lack of commitment or action towards water-related issues, it could impact our relationship with our customers and therefore our revenue. In a hypothetical scenario, we analyze how a 1% decrease in our revenue would impact our business. Avaya's FY18 revenue was \$2.851 billion; if our revenue decreased by 1% due to reputational harm, it would result in a loss of \$28,510,000.

Primary response to risk

Engage with customers

Description of response

Avaya mitigates reputational risk by directly engaging with our customers and providing information on our environmental goals and performance. Avaya publishes an annual Corporate Responsibility report that is made publicly available on our website. In addition, this is the second year that Avaya has responded to the Water Questionnaire per our customers' request. We will continue to be transparent about our impacts and build upon our efforts to continually reduce our environmental and water footprint.

Cost of response

0

Explanation of cost of response

The Avaya Corporate Responsibility program is a core part of our business; therefore, we do not consider taking action on climate change or water issues to incur an additional cost.

W4.2a

Primary risk driver

Severe weather events

Primary potential impact

Reduced revenues from lower sales/output

Company-specific description

Our cloud-based solutions rely on uninterrupted connection to the Internet through data centers and networks. To provide such service for our customers in North America, we utilize data center hosting facilities located in California, Colorado, Florida, Georgia, Iowa, North Carolina, Ohio, Oregon, Virginia and Washington. We also intend to serve other global customers from data center hosting facilities located in India, Japan and Singapore. We do not control the operation of these facilities, and they are vulnerable to service interruptions or damage from earthquakes, fires, power loss, or similar events related to severe weather. The occurrence

of these or other unanticipated problems at these facilities could result in lengthy interruptions in the ability to use our solutions efficiently or at all, which could harm our business, operating results and financial condition.

Timeframe

More likely than not

Are you able to provide a potential financial impact figure?

Yes, a single figure estimate

Potential financial impact figure (currency)

28510000

Potential financial impact figure - minimum (currency)

<Not Applicable>

Potential financial impact figure - maximum (currency)

<Not Applicable>

Explanation of financial impact

If one of Avaya's data center facilities experienced service interruptions or damage from a severe weather event, it may have an impact on our revenues from reduced services or operations. In a hypothetical scenario, we estimate how a 1% change in our revenue would impact us financially. Avaya's FY18 revenue was \$2.851 billion. If our revenue decreased by 1%, would result in a loss of \$28.51 million.

Primary response to risk

Include in Business Continuity Plan

Description of response

Avaya has a Disaster Recover Planning Program that supports risk management and mitigation at Avaya data center locations. Our IT team interfaces with other departments such as Business Continuity and Operations to provide technology recovery solutions if a service interruption were to occur. Critical servers, applications, and databases are backed up daily locally or replicated/mirrored offsite to a remote internal location. Additionally, Avaya implements various risk mitigation strategies at critical data centers including battery backups, diesel generators, fire safety, and security.

Cost of response

0

Explanation of cost of response

The Avaya Corporate Security and Business Continuity program is a core part of our business; therefore, we do not consider it to incur an additional cost.

W4.3

(W4.3) Have you identified any water-related opportunities with the potential to have a substantive financial or strategic impact on your business?

No

W4.3b

(W4.3b) Why does your organization not consider itself to have water-related opportunities?

	Primary reason	Please explain
Row 1	Opportunities exist, but none with potential to have a substantive financial or strategic impact on business	Avaya assesses its water risks and opportunities as part of its company-wide annual risk assessment. Avaya defines a substantive opportunity as an opportunity that has a potential to have a material legal, financial, operational, and/or reputational positive impact on our business. Although there are opportunities for water efficiency/reduction in our facilities, our water costs are minimal relative to our total operating costs, so any potential savings were not found to be substantive. This is because Avaya's facilities do not require significant amounts of water to operate and our products do not require any water to operate. However, Avaya is committed to improving our environmental performance and is committed to acting on climate change. We will repeat our assessment of risks and opportunities next year.

W6. Governance

W6.1

(W6.1) Does your organization have a water policy?

No

W6.2

(W6.2) Is there board level oversight of water-related issues within your organization?

Yes

W6.2a

(W6.2a) Identify the position(s) (do not include any names) of the individual(s) on the board with responsibility for water-related issues.

Position of individual	Please explain
Chief Executive Officer (CEO)	The Chief Executive Officer (CEO) is responsible for overseeing Avaya in its mission to bring about positive environmental, social, and economic change, which is part of our overall business strategy and impacts our operations. Examples of Avaya programs and initiatives that mitigate our impact on the environment and water resources include: • Avaya's Design for Environment program, which implements environmental product designs and identifies pollution prevention opportunities through the life cycle of our products; • Compliance with corporate policies such as the Supplier Code of Conduct, which includes requirements around water stewardship and management; and • Avaya's climate change strategy, which is focused on reducing our environmental impact and conserving resources.

W6.2b

(W6.2b) Provide further details on the board's oversight of water-related issues.

	Frequency that water-related issues are a scheduled agenda item	Governance mechanisms into which water-related issues are integrated	Please explain
Row 1	Other, please specify (CEO responsibility)	Other, please specify (CEO responsibility)	The CEO has responsibility for water-related issues and is a member of the board. However, water-related issues are not regularly scheduled agenda item for board meetings.

W6.3

(W6.3) Provide the highest management-level position(s) or committee(s) with responsibility for water-related issues (do not include the names of individuals).

Name of the position(s) and/or committee(s)

Other C-Suite Officer, please specify (Chief Administrative Officer and General Counsel (CAO & GC))

Responsibility

Both assessing and managing water-related risks and opportunities

Frequency of reporting to the board on water-related issues

Not reported to board

Please explain

Responsibility for climate-related issues, including water, lies with the Chief Administrative Officer and General Counsel (CAO & GC) for Avaya, a direct report to Avaya's CEO. Among other things, the CAO & GC heads the law department, which is focused on compliance and risk management and includes the Environmental, Health, and Safety (EHS), Corporate Responsibility, and Philanthropy groups. The CAO & GC has direct oversight and ultimate decision-making of our corporate-wide corporate responsibility strategy, programs and policies, sustainability goals, and management processes. For example, our annual Corporate Responsibility Report, and program budgets undergo review and approval by the CAO & GC.

W6.5

(W6.5) Do you engage in activities that could either directly or indirectly influence public policy on water through any of the following?

Yes, trade associations

Yes, other

W6.5a

(W6.5a) What processes do you have in place to ensure that all of your direct and indirect activities seeking to influence policy are consistent with your water policy/water commitments?

Avaya's Law Team includes personnel who monitor, review, and provide legal advice on current and emerging policies that are applicable to our business. Avaya's Senior Director of Corporate Responsibility, EHS and Philanthropy meets monthly with regulatory review personnel to exchange information and receive guidance to ensure our activities that influence policy are consistent with Avaya's overall climate change strategy. In addition, quarterly meetings are held with Avaya management to review our business activities and ensure consistency with climate change/water strategy and objectives.

W6.6

(W6.6) Did your organization include information about its response to water-related risks in its most recent mainstream financial report?

Yes (you may attach the report - this is optional)

Form 10-K_FY18.pdf

W7. Business strategy

W7.1

(W7.1) Are water-related issues integrated into any aspects of your long-term strategic business plan, and if so how?

	Are water-related issues integrated?	Long-term time horizon (years)	Please explain
Long-term business objectives	No, water-related issues were reviewed but not considered as strategically relevant/significant	5-10	Avaya's facilities do not require significant amounts of water to operate and our products do not require any water to operate; therefore, we do not consider water-related issues to be material to our business at this time. We do not expect this will change in the future because the nature of our business, operations, and supply chain will not require significant quantities of water. However, Avaya is committed to continually improving our environmental performance acting on climate change. We will repeat our assessment of water-related issues on an annual basis.
Strategy for achieving long-term objectives	No, water-related issues were reviewed but not considered as strategically relevant/significant	5-10	Avaya's facilities do not require significant amounts of water to operate and our products do not require any water to operate; therefore, we do not consider water-related issues to be material to our business at this time. We do not expect this will change in the future because the nature of our business, operations, and supply chain will not require significant quantities of water. However, Avaya is committed to continually improving our environmental performance acting on climate change. We will repeat our assessment of water-related issues on an annual basis.
Financial planning	No, water-related issues were reviewed but not considered as strategically relevant/significant	5-10	Avaya's facilities do not require significant amounts of water to operate and our products do not require any water to operate; therefore, we do not consider water-related issues to be material to our business at this time. We do not expect this will change in the future because the nature of our business, operations, and supply chain will not require significant quantities of water. However, Avaya is committed to continually improving our environmental performance acting on climate change. We will repeat our assessment of water-related issues on an annual basis.

W7.2

(W7.2) What is the trend in your organization's water-related capital expenditure (CAPEX) and operating expenditure (OPEX) for the reporting year, and the anticipated trend for the next reporting year?

Row 1

Water-related CAPEX (+/- % change)

0

Anticipated forward trend for CAPEX (+/- % change)

0

Water-related OPEX (+/- % change)

0

Anticipated forward trend for OPEX (+/- % change)

0

Please explain

This is our first year of measurement, so we are not able to provide information on a trend in our water-related expenditures. Once we have more than one year of data, we can begin to gain insight on any trends.

W7.3

(W7.3) Does your organization use climate-related scenario analysis to inform its business strategy?

	Use of climate-related scenario analysis	Comment
Row 1	No, but we anticipate doing so within the next two years	Climate-related scenario analysis was recently introduced as part of the CDP questionnaire, so Avaya is spending time researching and understanding the different types of scenarios, methodologies, and assumptions. Although we were unable to complete an in-depth analysis this year, we are preparing to conduct one in the future and will use it to inform our strategy.

W7.4

(W7.4) Does your company use an internal price on water?

Row 1

Does your company use an internal price on water?

No, and we do not anticipate doing so within the next two years

Please explain

Avaya's facilities do not require significant amounts of water to operate and our products do not require any water to operate.

Because our water costs are minimal relative to our total operating costs, Avaya is not using an internal price on water at this time.

W8. Targets

W8.1

(W8.1) Describe your approach to setting and monitoring water-related targets and/or goals.

	Levels for targets and/or goals	Monitoring at corporate level	Approach to setting and monitoring targets and/or goals
Row 1	Our company sets no targets or goals	<Not Applicable>	<Not Applicable>

W8.1c

(W8.1c) Why do you not have water target(s) or goal(s) and what are your plans to develop these in the future?

	Primary reason	Please explain
Row 1	Important but not an immediate business priority	Avaya's facilities do not require significant amounts of water to operate and our products do not require any water to operate; therefore, our company does not currently have a formal water target or goal. However, Avaya is dedicated to reducing our environmental impact. We will continue to monitor our water consumption and costs and assess our water-related issues on an annual basis.

W9. Linkages and trade-offs

W9.1

(W9.1) Has your organization identified any linkages or tradeoffs between water and other environmental issues in its direct operations and/or other parts of its value chain?

No

W9.1b

(W9.1b) Why has your organization not identified any linkages or tradeoffs between water and other environmental issues?

	Primary reason	Please explain
Row 1	Not considered, and we have no plans to do so	Avaya acknowledges the complex, interrelated relationships between climate change and water issues. This is our second year of reporting to the CDP Water Questionnaire, so we are evaluating our water risks and opportunities and how they are being managed. We plan to look at how to identify linkages and tradeoffs – the positive and negative impacts our water management practices may have on another environmental issue, such as energy.

W10. Verification

W10.1

(W10.1) Do you verify any other water information reported in your CDP disclosure (not already covered by W5.1d)?

No, we do not currently verify any other water information reported in our CDP disclosure

SW0.2

(SW0.2) Do you have an ISIN for your organization that you are willing to share with CDP?

Yes

SW0.2a

(SW0.2a) Please share your ISIN in the table below.

	ISIN country code	ISIN numeric identifier (including single check digit)
Row 1	US	0534991098

SW1.1

(SW1.1) Have you identified if any of your facilities reported in W5.1 could have an impact on a requesting CDP supply chain member?

We do not have this data and have no intentions to collect it

SW1.2

(SW1.2) Are you able to provide geolocation data for your site facilities?

No, this is confidential data

SW2.1

(SW2.1) Please propose any mutually beneficial water-related projects you could collaborate on with specific CDP supply chain members.

SW2.2

(SW2.2) Have any water projects been implemented due to CDP supply chain member engagement?

No

SW3.1

(SW3.1) Provide any available water intensity values for your organization's products or services across its operations.

Submit your response

In which language are you submitting your response?
