The Avaya XT5000 provides exceptional video, audio, and data quality along with ease-of-use designed to make users successful. The XT5000 incorporates dual 1080p 60fps live video and content, HD audio, simultaneous H.264 High Profile and Scalable Video Coding (SVC), and multi-party calling. Available PTZ cameras offer up to 20x optical zoom (12x digital) to view details and include wide-angle capability for group participation.

The second video stream can be used with an additional camera or for high resolution 60fps data and content sharing. An embedded MCU with support for continuous presence with up to 9 participants is available. The advanced audio system delivers CD-quality, 20kHz stereo audio for added presence to meetings, and the available three-way beam forming digital microphone pod isolates speakers from background noise. The user interface is designed for simplicity along with Apple iPad or iPhone control for enhanced capabilities. The XT5000’s refinement not only enhances the user experience but its modern hardware design complements any conference room.

Exceptional Experience

The Avaya XT5000 provides an exceptional meeting experience. Simultaneous HD 1080p 60fps for live video and content and CD-quality, 20kHz stereo audio deliver a comfortable, high clarity experience. H.264 High Profile provides bandwidth efficiency and H.264 Scalable Video Coding (SVC) offers high network error resiliency. The XT5000 delivers excellent performance in real-world network conditions.
Extraordinary Power
The XT5000 harnesses significant power for demanding conferencing applications. Two full 1080p 60fps video channels, H.264 High Profile and SVC, an embedded 9-way multi-party MCU, Apple iPad and iPhone control—all combine to make the XT5000 one of the most powerful video conferencing systems ever created in its class.

Intuitive, Easy to Use
The XT5000 delivers intuitive meeting control with little or no training required. With Microsoft Exchange calendar support, users can join meetings directly from the integrated calendar. The on-screen participant list gives leaders full meeting moderation, and with Avaya Screen Link, users can wirelessly present content from their laptops. Avaya Mobile Link enables seamless meeting transitions with your Avaya Equinox™ mobile UC application, while optional Apple iPad or iPhone control makes the system even easier to use.

Sleek and Elegant Design
The XT5000’s refinement and polish go beyond the user experience to the sleek and elegant hardware design of the system. The XT5000 is a natural fit for today’s businesses.

All-in-one, Easy to Deploy
The XT5000 is also offered as a unique all-in-one video collaboration solution combining its room system capabilities with embedded 9-way multi-party conferencing, along with desktop and mobile connectivity for remote participants including firewall traversal. The system can also be automatically configured with minimal user intervention. A provisioning code entered at startup configures the XT5000 with a profile created through Avaya Equinox, enabling deployment without technical resources.
