Avaya Model 3902 Digital Deskphone
Voluntary Product Accessibility Template (VPAT)

The Avaya 3902 Digital Deskphone is an endpoint terminal used in conjunction with the
Avaya Communication Server 1000 and Avaya Communication Server 2100.

### Support Levels

<table>
<thead>
<tr>
<th>Support Level</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Supports</td>
<td>Avaya 3902 Digital Deskphones fully meet the letter and intent of the criterion.</td>
</tr>
<tr>
<td>Supports with Exceptions/Minor Exceptions</td>
<td>Avaya 3902 Digital Deskphones do not fully meet the letter and intent of the criterion, but provide some level of access relative to the criterion.</td>
</tr>
<tr>
<td>Supports through Equivalent Facilitation</td>
<td>Avaya 3902 Digital Deskphones provide an alternate way to meet the intent of the criterion.</td>
</tr>
<tr>
<td>Supports when combined with Compatible Assistive Technology</td>
<td>Avaya 3902 Digital Deskphones fully meet the letter and intent of the criterion when used in combination with compatible assistive technology.</td>
</tr>
<tr>
<td>Does Not Support</td>
<td>Avaya 3902 Digital Deskphones do not meet the letter or intent of the criterion.</td>
</tr>
<tr>
<td>Not Applicable</td>
<td>The criterion does not apply.</td>
</tr>
<tr>
<td>Not Applicable – Fundamental Alteration Exception Applies</td>
<td>A fundamental alteration of the Avaya 3902 Digital Deskphone is required to meet the criterion.</td>
</tr>
</tbody>
</table>

### § 1194.23 Telecommunications Products

<table>
<thead>
<tr>
<th>Criteria</th>
<th>Support Levels</th>
<th>Remarks and Explanations</th>
</tr>
</thead>
<tbody>
<tr>
<td>1194.23(a) Telecommunications products or systems which provide a function allowing voice communication and which do not themselves provide a TTY functionality shall provide a standard non-acoustic connection point for TTYs. Microphones shall be capable of being turned on and off to allow the user to intermix speech with TTY use.</td>
<td>Supports</td>
<td>Any “Voice Carry Over” capable TTY device, such as the Avaya Model 8840, can be used in conjunction with the Communications Server 1000 via direct analog connectivity. The following options are available if it is desirable to use a TTY device in conjunction with a Communications Server 1000 IP or TDM telephone: Through the provisioning of an auto dial key with the No Hold Conference feature, system IP and TDM desk phones can be configured to bridge a TTY device onto calls with one button access. Users can answer the desk phone initially, and then through a single button press, the TTY device will be bridged into the call as desired. This feature is available for all proprietary IP and TDM telephone sets. For analog telephone sets, the telephone and TTY can be programmed on the same loop, thereby effectively bridging them together.</td>
</tr>
<tr>
<td>1194.23(b) Telecommunications products, which include voice communication functionality, shall support all commonly used cross-manufacturer non-proprietary standard TTY signal protocols.</td>
<td>Supports</td>
<td>Using the configuration described in 1194.23(a), this is supported.</td>
</tr>
<tr>
<td>1194.23(c) Voice mail, auto-attendant, and interactive voice response telecommunications systems shall be usable by TTY users with their TTYs.</td>
<td>Not applicable</td>
<td></td>
</tr>
<tr>
<td>1194.23(d) Voice mail, messaging, auto-attendant, and interactive voice response telecommunications systems that require a response from a user within a time interval, shall give an alert when the time interval is about to run out, and shall provide sufficient time for the user to indicate more time is required.</td>
<td>Not applicable</td>
<td></td>
</tr>
<tr>
<td>1194.23(e) Where provided, caller identification and similar telecommunications functions shall also be available for users of TTYs, and for users who cannot see displays.</td>
<td>For users of TTYs: Supports For users who cannot see displays: Does not support</td>
<td>When a TTY device and desktop telephone are configured in the manner described in the response to 1194.23(a), the caller identification will be presented visually by the display of the telephone that is paired with the TTY device.</td>
</tr>
<tr>
<td>1194.23(f)</td>
<td>For transmitted voice signals, telecommunications products shall provide a gain adjustable up to a minimum of 20 dB. For incremental volume control, at least one intermediate step of 12 dB of gain shall be provided.</td>
<td>Supports with exceptions</td>
</tr>
<tr>
<td>-------------</td>
<td>--------------------------------------------------------------------------------------------------</td>
<td>--------------------------</td>
</tr>
<tr>
<td>1194.23(g)</td>
<td>If the telecommunications product allows a user to adjust the receive volume, a function shall be provided to automatically reset the volume to the default level after every use.</td>
<td>Supports</td>
</tr>
<tr>
<td>1194.23(h)</td>
<td>Where a telecommunications product delivers output by an audio transducer which is normally held up to the ear, a means for effective magnetic wireless coupling to hearing technologies shall be provided.</td>
<td>Supports</td>
</tr>
<tr>
<td>1194.23(i)</td>
<td>Interference to hearing technologies (including hearing aids, cochlear implants, and assistive listening devices) shall be reduced to the lowest possible level that allows a user of hearing technologies to utilize the telecommunications product.</td>
<td>Supports</td>
</tr>
<tr>
<td>1194.23(j)</td>
<td>Products that transmit or conduct information or communication, shall pass through cross-manufacturer, non-proprietary, industry-standard codes, translation protocols, formats or other information necessary to provide the information or communication in a usable format. Technologies which use encoding, signal compression, format transformation, or similar techniques shall not remove information needed for access or shall restore it upon delivery.</td>
<td>Supports</td>
</tr>
<tr>
<td>1194.23(k)(1)</td>
<td>Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be tactilely discernible without activating the controls or keys.</td>
<td>Supports</td>
</tr>
</tbody>
</table>
### 1194.23(k)(2)
Products which have mechanically operated controls or keys shall comply with the following:
Controls and Keys shall be operable with one hand and shall not require tight grasping, pinching, twisting of the wrist. The force required to activate controls and keys shall be 5 lbs. (22.2N) maximum.

| Supports | Avaya 3902 Digital Deskphones satisfy this requirement. |

### 1194.23(k)(3)
Products which have mechanically operated controls or keys shall comply with the following: If key repeat is supported, the delay before repeat shall be adjustable to at least 2 seconds. Key repeat rate shall be adjustable to 2 seconds per character.

| Supports | Avaya 3902 Digital Deskphones satisfy this requirement. |

### 1194.23(k)(4)
Products which have mechanically operated controls or keys shall comply with the following: The status of all locking or toggle controls or keys shall be visually discernible, and discernible either through touch or sound.

| Supports with exceptions | The status of all locking and toggle controls is visually discernible, but not discernible by touch or sound. |
