Improving the Guest Experience with Advanced Communications Solutions for Hotels / Motels

Avaya works with hospitality groups around the world to help them use communications to differentiate their properties in today’s expanding, competitive marketplace.

The New Guest Experience

The secret to success in the hospitality industry has never changed: attract more guests and keep them coming back.

Price, quality, efficiency and extra amenities all make a difference. And so, increasingly, does the quality of your communications system.

Particularly for the seasoned business traveler, how well you handle communications can make you stand out in the marketplace by delivering an enhanced guest experience.

Ask yourself—are you using your communications system to:

• Simplify booking and registration, personalizing service for repeat customers
• Quickly and easily connecting to any member of your staff, anywhere on your premises, to speed guest services
• Provide enhanced communications capabilities, such as meet-me conferencing calls, that are ideally suited for business travelers

Avaya works with hospitality groups around the world to help them use communications to differentiate their properties in today’s expanding, competitive marketplace.

Let us show you what IP Office can do for you.
Simplifying Reservations—and Much More!

Streamlining Reservations

Handling reservations right is the first step toward creating the ideal customer experience. From the moment a guest calls, your service needs to be fast, accurate and efficient and as personal as possible. Avaya IP Office will help make it happen by delivering:

- Multi-channel capabilities help you gain new customers. When a potential customer is browsing your website, offer a conversation via voice, web chat or email.
- Call routing capabilities that minimize hold times, quickly delivering guest calls even during peak periods.
- Point-and-click call management that enables reservation agents to easily handle calls via an on-screen interface while also checking room inventory, reservations records and other information.
- Programming that instantly recognizes repeat customers, providing the personal touch that drives customer loyalty.

Sharing Reservation Resources

If you have multiple properties, Avaya IP Office makes it easy to pool call handling resources to enable shorter hold times and more qualified agents handling the calls. Also share your messaging system and company directory across locations.

Use your communications to attract more business and offer new revenue-producing services—Avaya makes it easy with the Avaya IP Office™ Platform.

It's designed with the communications capabilities you need to sell more rooms and deliver the personal service that builds customer loyalty. And by streamlining communications, it lowers your overhead.
Home Agents

Because it is an IP-based system, you can have people working from any location—including their own homes—with all the call handling capabilities they need, and still be centrally managed. It’s a cost-effective way to take advantage of qualified people for short periods of time.

Easy Reachability

Do you have staff that don’t work in a fixed location and rely on a mobile phone to stay in touch? Do they ever give out their personal mobile phone numbers to customers or vendors? Doing so raises a host of issues: confusion with vendors and customers, security issues and the potential for real problems during a crisis when having the correct reach number is vital. With Avaya IP Office, everyone on your staff that uses a mobile phone can give out one number—your main number and their individual extension—and IP Office automatically routes any incoming call to their mobile, desk phone, even (if appropriate) their home phone. There’s no question about which number to use. Guests can instantly reach staff. In addition, IP Office can convert voice mail messages to email and instantly forward them to your staff to be retrieved on a mobile device.

Making it Easy to Get Information

With Avaya IP Office you can easily implement automated services including wake-up calls, reservation reminders, information on hotel services, local attractions, etc.

Conference Calls

Communications-savvy travelers expect amenities such as wireless Internet access in their room. Now you can offer another service: conference calling. Avaya IP Office comes with up to 512 conference ports—completely eliminating the need for outside services and providing you with a new amenity or revenue-producing service.

Simple, Low-Cost Administration

IP Office takes the hassle out of reconfiguring your communications system to keep up with staff changes or to add or relocate phones and other devices. If a member of your staff leaves, or you want to set up communications on another device or in another location (including a home office), just plug in and power on—IP Office automatically reads the IP address of the device. If you have multiple locations, you can also easily manage all systems from a single Microsoft Windows-based interface (no travel costs).
Price, quality, efficiency and extra amenities all make a difference. And so, increasingly, does the quality of your communications system.
